

A photograph of a modern rail station platform. The architecture features large, curved, metallic structures and glass facades. Two high-speed trains, one green and yellow and another yellow and green, are stopped at the platform. A person in an orange safety vest is visible on the platform. The overall scene is brightly lit, suggesting daytime.

Why Erlau Station Seating?

The distinctive feature of Erlau Seating systems is the modularity in design, allowing you to choose different leg options, colours and surface finishes.

Designed, engineered and made in-house to high quality ISO standards using high quality, sustainable raw materials.

Corrosion, weather and vandal resistant with a 10 year rust proofing warranty.

Easy cleaning and no maintenance due to open wire mesh structure with no water logging or moisture ingress, and rain results in a cleaning effect.

Cost effective long service life, durability and stability with few repairs – no need for replacement and guaranteed performance.

Easy assembly with standard interfaces, individual components can be replaced easily and quickly.

Erlau manufacture and supply a range of seating solutions since 1828, is ISO9001 approved and a key supplier to Deutsche Bahn and other stations around the world.

Our platform seating offers customers a great degree of functionality and design combined with versatility, durability and comfort for the end user.

Erlau is a subsidiary company of RUD Ketten Rieger & Dietz GmbH u.Co.KG who produces top quality chain systems and components.

The Quality

Top quality, innovative products are what you get with the Erlau seating range. Wire mesh is one of our most popular and traditional seating materials that provides strength, stability and cleaning free maintenance.

The benches are powder-coated with Rilsan at a thickness of 390 microns providing a high level of durability, dirt resistance and insulation. As a result, Erlau furniture never warms up in excess of 42°C (108°F) a great advantage compared to benches made of wood, stone or pure metal.

Erlau seating systems offer a long product life cycle as well as great value for money. Our Innovative anti-graffiti coating helps our customers safe guard their assets from vandalism.

Available In A Variety Of Colours & Finishes

New:

Customisable Bench Backrest

Logo's, Pictures, City Maps, Wayfinding, Advert Campaigns in
High Resolution Colour Print on your Bench Backrest
